If you want to know the best version of InfoRapid KnowledgeBase Viewer, please click the button below:Headphone ports on notebooks and desktops have become the norm for wired headphones. And we've seen some amazing headphones that look good, are rugged, and have great sound. But until now there has been no great solution for small, on-the-go, wireless headphones. Until now. Introducing the JayBird X3. Measuring in at just under two inches wide and weighing in at a little over an ounce, the X3 has a sleek, minimalist shape that is ergonomic, comfortable and easy to hold for those on the go. Best of all, it's truly wireless, with a range of up to 15 feet (4.6m). The X3 works with your Mac, PC, iPad and iPhone. It's also water resistant for safe use in the rain. The JayBird X3 is a rechargeable wireless Bluetooth headset that's not bulky or uncomfortable to wear. You can use it anywhere, anytime. When you're done, just

recharge the battery and switch it back to its compact, flat shape. There are no buttons, just one large, clickable, touchpad on the side of the X3. Push the button to answer a phone call, long press for a call drop, and the side button to switch the X3 to airplane mode or mute it. To take a call, you just speak into the microphone (the side button does not perform a headset's default earpiece function). If you have an iPad or iPhone, the X3 works seamlessly with 09e8f5149f
