It is in the trial version but still worth getting. The trial version is working well with all trial free time this week. I wish you can download the pro version for free. If you're a Samsung owner, you will love this program because it has a simple and intuitive interface, enabling you to scan a wide range of TV channels, and it also enables you to define favorites with any channels or stations that you want, and you can even configure your TV's picture display to show what you want when you want. Just a quick update about my favorite tv show...the most downloaded programs on this site... I have been a big fan of Keyword TV Guide for years but think that is a great application that didn't get the attention it deserved over the last few years, I decided to see if I could write a better application for Keyword TV Guide and since Keyword TV Guide is still listed as a supported application I thought I'd write this. On behalf of "TVBoys" and myself I want to thank the KeywordTVGuide-Home team for their support. The latest builds are outstanding compared to the older versions, this build adds support for MyKeyword.TVGuide app and new build will use the latest app information. This means that the latest app is checked for new content and new channel added. In order to preview your favorites, you must be in the "Preview" mode. The "Preview" mode adds the ability to enable displaying the text beside the channel as well as the text label for the channel. ...as well as some nifty features, such as right-clicking to open up the more complex menu. However, if you're looking for an easier way to use this application, it's really perfect. There are many features: * New and updated TV stations * Updated Live TV channel metadata * Added support for SCM archive files (manually or automatic)
