Extended Description: With the addition of the progress bar (optionally), I am presenting this work, a dock icon icon set designed to be used with DockbarX or DockbarX Pro. This is a WIP work and I have not used them myself (yet). To include your own applications or fonts in this project you will need to change two lines in the code (dockicon.ico, line 24 and dockicon.pss, line 10). You can also make the entire project open source if you wish (and please do feel free to submit your own as well). If you feel like following me in this project, then do so. I am not a design guru nor do I make money on this, but just a humble man who wants to share with others what he has made so far.
